REQUIREMENTS
CLEAN SOIL DISPOSAL REQUESTS

Requests for Clean Soil Disposal equal to or greater than 10 cubic yards must include the following in order to be reviewed:

1. **Requester Information**
   a. Business Name and Mailing Address.
   b. Contact Person Name and Title.
   c. Email Address and Phone Number.

2. **Material information**
   a. Accurate description of material.
   b. Explanation as to how material was generated (note any suspected contamination).
   c. Origin of material with exact location of generation site.
   d. Total amount of material in tons or pounds.
   e. Frequency of material to be generated (e.g., daily, weekly, monthly, or one-time event).
   f. Moisture-content percentage of material (must be less 50 percent).
   g. A statement that the generated material is non-hazardous based on Title 22 of the California Code of Regulations Sections 66261.20, 66261.3, and 66262.11.

3. **Attachment of laboratory analytical reports that support non-hazardous statement**
   a. Typical analysis includes EPA Method 6020/7471 and Total Petroleum Hydrocarbons using EPA Method 8015.
      i. NOTE: Above analysis tests for the toxicity characteristic of a waste material; the ignitability, corrosivity, and reactivity of the waste material must also demonstrated to be within acceptable tolerances as provided in Title 22.
