**Subject:** FW: Upcoming Special Art Committee meeting

Here is my edited version of the Master Art Plan I did not even attempt to edit the ordinance as in is being completing rewritten based on the committees direction.

It is very important to focus on the words and not the pictures.

Most of the Master Plan words can be deleted as they are redundant or irreverent to what is being proposed in the City of Santa Maria.

These are the same comments I have provided to you for the last two years but you have not accepted them in the Master Plan document.

As I have offered for the last two months I would be glad to meet with you to work on a new version of the Master Plan that is appropriate for Santa Maria.

I know that I have been very persistent but having been involved with many planning issue in the City of Santa Maria for the last 30 years I want to see things done right legally.

This Master Plan is in draft form and now needs to be rewritten to reflect all of the comments provided over the last two years.

Laurie
