City Hall Flagpole Pulley to be Repaired

The flagpole outside Santa Maria City Hall has not been operational for just over a week because of a broken pulley system. The pulley system broke when staff tried to return the flag to full staff on Monday, September 23rd, and that resulted in the American flag and State flag being flown at $\frac{3}{4}$ height since.

Replacement parts have been ordered for the historic flagpole, a City landmark, and other parts are being fabricated in-house. The new gear will be installed with the use of the Fire Department's ladder truck next Tuesday, October 8.

Questions may be directed to the City Manager's Office at 925-0951 ext. 372.
